

2017 FLUSH AREA

**2017 Water Main Flushing Program**

Start Date: May 8, 2017  
 End Date: Undetermined (approx. 10 days)

Flushing is conducted overnight between 8pm and 8am. Due to complications flushing may not be completed on your block when planned.

If the "WATER MAIN FLUSHING" signs are present on your block, you may use water normally from 8:00am to 8:00pm and follow the TIPS below before 8:00pm.

The following tips are provided to protect your home from the discoloured water and sediment produced by the flushing process. If these are followed there should be no problems.

- TIPS:**
- Do not use water from any taps, etc. after 8:00 pm. Fill your bath tub or a pail before 8:00 pm for water to flush your toilet if required.
  - Turn off your water softener, freezer, or any other device that may use water on a timer system.
  - Run the water from an outside tap for 10 minutes or until the water runs clear (if necessary).
  - Restart your water softener and any other devices that were turned off.

Please note the City will not be responsible for any problems created by NOT following these Tips.

Businesses located in the flushing area that operate between 8:00 pm and 8:00 am are encouraged to contact the City for further information.

Thank you for your cooperation. Call 306-445-1700 for further information.

Watch for the "WATER MAIN FLUSHING" signs.
